

ARIDE

QUARTZ

Sawyer and Southern, a leader in innovative flooring designs, presents the Aride QPC rigid core vinyl collection. Inspired by ancestral Pueblo sites, the line features emulated reactive stains and color dimensions not found in other lines. Aride offers Selected and Character looks that will enhance any interior space, all centered on European Oak in wide widths of 7.2" and lengths of 5ft. One of the innovative design elements is that most of our decors have complementary pairing to the Aride wood collection. Aride brings timeless beauty to any setting.

CONSTRUCTION:	Waterproof SPC with quartz finish, Beveled Lox® locking system
BACKING:	IXPE sound-absorbing foam
Environment:	FloorScore® Certified

Rigid Core QPC:

All samples are produced to be a close representation of the actual finished product. The finished flooring may contain a larger variation of color, grain, knots, and other character than may be evident in the smaller sample you are viewing. Samples that are aged or have been exposed to direct sunlight may appear different (darker or yellowed), than the flooring it is meant to represent.

The Character designation is an emulation of a natural wood flooring Character grade, chosen to represent an aesthetic Character. Character such as knots and light checks, along with all higher grades including Selects, are remaining. This grade is truly the most representative of the beauty of wood, in its most enhanced, character state.

Each Aride QPC is unique.
